Emergency Repatriation

COVID - 19

450 staff and students

Repatriation of 450 personnel from around the world, within 4 days.

When the Australian Government announced that Australian borders would be closed to reduce the spread of COVID-19, a major Australian University requested assistance with the repatriation of 450 students and staff from across the globe. We had four days to achieve this and successfully got all staff and students back to Australia before the borders were closed.
